Vulnerability Assessment

Vulnerability analysis is the frontline in securing an organization. Aurora can develop custom-built methodologies to utilize your personnel and financial resources to help meet business goals. Vulnerability scanning is a necessary tactical approach to securing all the "low-hanging" risk in an infrastructure. Tests will be conducted against Internet perimeters and internal systems using real world attacks techniques in an automated manner.

How the process works:

- Remote testing of internal networked devices via a VPN connection
- Architecture review
- Automated external scanning
- Automated internal security scanning
- Recommendations matrix as final delivery report
- Fixed fee

Key value propositions include:

- Quickly validate problems and resolution, prioritize vulnerabilities
- Automated testing provides recommendations for remediation
- Development of key remediation recommendations

BUSINESS VALUE

- Cost effective compliance
- Prioritized and simplified recommendations
- Achieve greater return on investment
- Optimized implementation
- Knowledge transfer

FEATURES & BENEFITS

- Review of network, operating system, and application security
- Determine weaknesses in access controls, vulnerability management processes, incident handling processes
- Understand weaknesses in existing policies, procedures and standards
